Fine-grained access controls & audit logs

Granularly control what users can access which apps and which resources. And after they use the apps, query what they did via the audit logs. (Which you can then build Retool apps atop of.)

SAML SSO and 2FA

Sign in with the services you already use, including Google, Okta, Active Directory Federation Services, and other SAML-based identity providers. Import groups and use them inside of Retool.

F-Pattern

This section illustrates an F-pattern layout for a testimonial page. It features three rows, each with a video thumbnail on the right and a text block on the left. A large red arrow starts at the top right, moves down the right side, and then branches left to point at each text block, following the F-pattern. Each text block includes a name, a quote, and a 'Learn More' button.

This section illustrates an F-pattern layout for a product page. It features three rows, each with an icon on the left and a text block on the right. A large red arrow starts at the top left, moves down the left side, and then branches right to point at each text block, following the F-pattern. Each text block includes a title, a description, and a 'Learn More' button.

Digestive Enzymes

Digestive enzymes are a group of proteins that act as biological catalysts to break up & digest other proteins, fats, and carbohydrates. They are found in humans, plants, animals, and fungi. In the human body, they're naturally produced in the gastrointestinal tract and used to break down food.

Probiotics

Probiotics are microorganisms that live in the body. are microscopic living organisms intended to benefit our health by improving or restoring the gut flora. While the use of probiotics for purported health benefits is far from new - dating back to Roman times! - their use is increasingly being studied for potential benefits such as preventing infections, boosting the immune system, maintaining healthy skin, and strengthening our nervous system.

Prebiotics

You can think of prebiotics as "food" for your probiotics. They support the growth of healthy and beneficial bacteria in the gut and they can lead to durable change in the overall function of the gut microbial community.

INGA-SAURUS COLOURING BOOK

Inga loves dinosaurs, she has a big collection of them, but Inga also has an extremely rare heart defect and needs a life saving operation urgently.

To help raise money for her surgery on the 15th - the only date in the month for having such specialist heart surgery - we've created the Inga-saurus Colouring Book.

We invited artists and illustrators from around the world to create a dinosaur, creating this fantastic collection ready for your Inga-saurus Colouring Book.

[Download PDF](#)

Or simply print & paste on with some of your friends!

I love dinosaurs because there are so many of them, you can learn about a new one everyday. But also because they are big and scary! **RAWR!**

Inga 5 years old

A heart for Inga
Bart's mum, Mimi, has an extreme form of Bartter's disease, a rare heart defect. At five years old, she is already halfway through the 15th without the heart surgery she needs to survive.

This surgery is only available at the Queen's Medical Centre in the United Kingdom. Dr. Brian Taylor is the heart surgeon. His family need to raise £100,000 by the end of March 2020 to fund the life-saving treatment and give Inga the best possible chance of a healthy, normal life.

Any donation you can give to help Bart's family reach their fundraising goal would be tremendously appreciated.

Your dinosaur colouring
Have you had a coloring time? [Add up a photo](#) of your beloved masterpiece or share your collection coloring with us on Facebook and Twitter @IngaSaurus.

Huge thanks to all of the amazing artists who have made this book possible.

Loading script asynchronously as a Promise in JavaScript

February 3, 2021 · 1 min read

In most projects, an external library must be used (e.g. YouTube Player, Google Maps...), so the idea is to create a function to load the script asynchronously using Promise that will be resolved when the script is loaded. We can then trigger actions in the Promise and ensure that everything is executed correctly when loaded.

```
const loadScript = (src, async = true, type = "text/javascript") => {
  return new Promise((resolve, reject) => {
    try {
      const tag = document.createElement("script");
      const container = document.head || document.body;

      tag.type = type;
      tag.async = async;
      tag.src = src;

      tag.addEventListener("load", () => {
        resolve({ loaded: true, error: false });
      });

      tag.addEventListener("error", () => {
        reject({
          loaded: false,
          error: true,
          message: `Failed to load script with src ${src}`;
        });
      });

      container.appendChild(tag);
    } catch (error) {
      reject(error);
    }
  });
};
```

Let's try to load a script:

```
loadScript("https://www.youtube.com/iframe_api")
  .then((data) => {
    console.log("YouTube script successfully loaded", data);
  })
  .catch((error) => {
    console.error(error);
  });
```

That's it!

Before you leave...

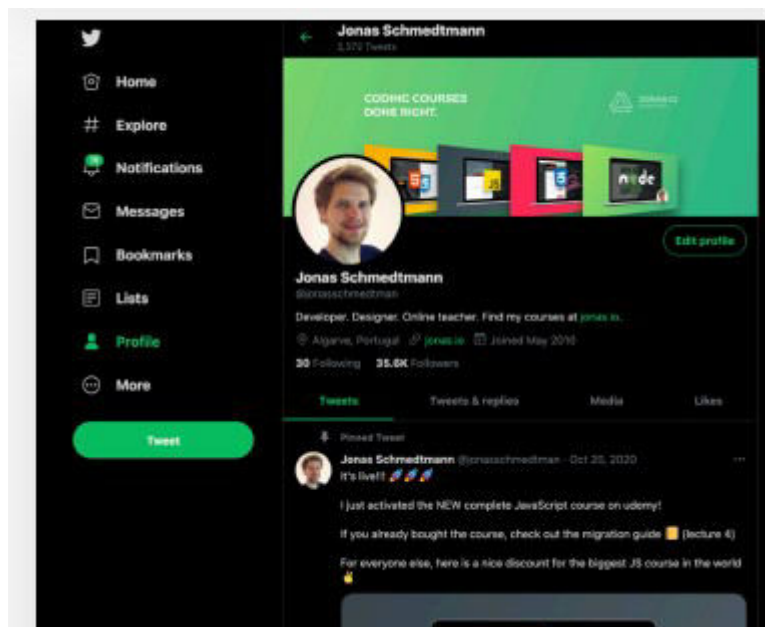

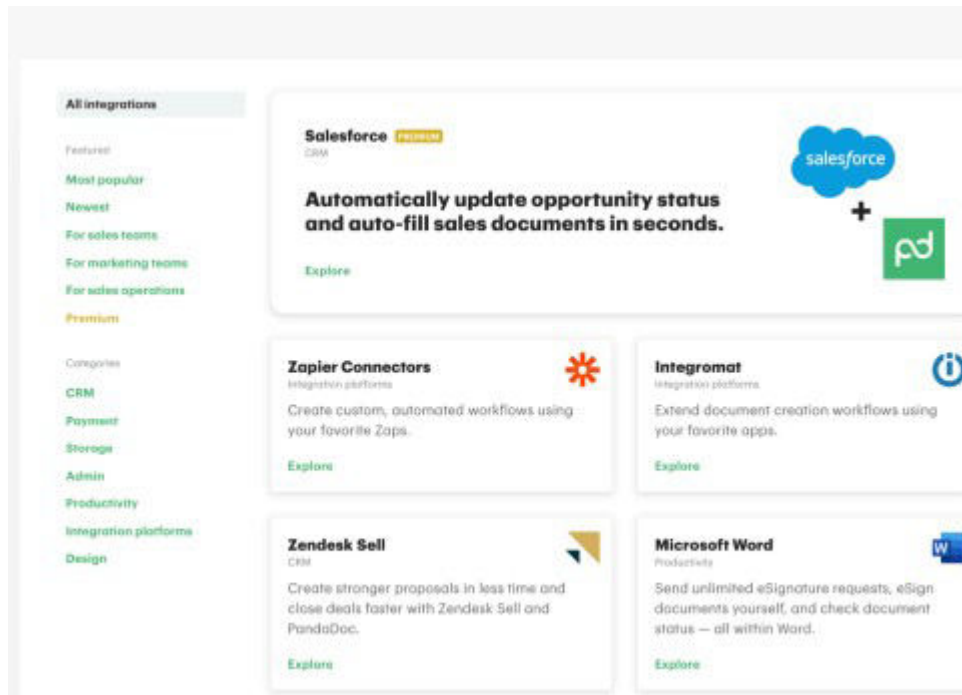

Thanks for reading! 🙌
